## EDUCATION

### Graphic Era Hill University

Bachelor of Technology in Computer Science and Engineering, CGPA: 7.1

Dehradun, India

Aug. 2022 – Jun. 2026

### Sri Chaitanya Techno School

Intermediate, Percentage: 89.8

Visakhapatnam, India

Apr. 2020 – Mar. 2021

## EXPERIENCE

### Software Engineer Intern

BlueBinaries Engineering and Solutions Pvt. Ltd.

Jun. 2026 – Present

Chennai, India

- Architected a full-stack automotive test-intelligence platform (React/TypeScript, Node.js/Express/TypeScript, PostgreSQL) across an npm-workspace monorepo, exposing 80+ REST endpoints to test-engineering stakeholders.
- Engineered an automated ingestion pipeline that watches, hashes, and classifies dSPACE PDF and NI TestStand HTML reports in real time, cutting manual report-processing effort by an estimated 70%.
- Built a Server-Sent Events broadcast layer wired into TanStack Query cache invalidation, dropping dashboard staleness to under 2 seconds across 9 live data views.
- Secured the platform with JWT authentication, bcrypt hashing, tiered rate limiting, and automatic account lockout after repeated failed logins across all auth endpoints.

### Software Engineer Intern

PearlThoughts

Jul. 2025 – Aug. 2025

Remote, India

- Accelerated feature delivery on a live doctor-appointment application by engineering reusable, OOP-structured components for profiles, booking, registration, and search in JavaScript, HTML, and CSS.
- Enabled real-time, seamless appointment scheduling by integrating REST APIs that powered accurate, live doctor-availability updates.
- Reduced cross-browser defects reaching production by performing systematic testing and debugging across Chrome, Firefox, and Safari before every sprint release.
- Delivered on-time, every sprint, across a distributed team by participating in Agile ceremonies and maintaining clean, version-controlled code via Git.

## PROJECTS

### Credit Risk & Fraud Analytics Platform | [Link](#)

Apr. 2026 – May 2026

- Delivered production-grade credit risk scoring for lending decisions by building an XGBoost-based risk engine with SHAP explainability for transparent, auditable results.
- Unified real-time fraud detection with credit risk scoring by combining both models behind a single FastAPI service with cost-sensitive threshold optimization.
- Guaranteed audit-trail integrity and early drift detection by implementing hash-chained audit logging and PSI-based drift monitoring for production models.

### Resume Analytics Engine | [Link](#)

Feb. 2026 – Mar. 2026

- Cut recruiter shortlisting time by 60% across 200+ job postings by building an automated, NLP-driven resume-screening and scoring pipeline in Python.
- Improved resume-job match precision by 22% over keyword-only methods by engineering a semantic matching engine processing 300+ applicants daily.
- Raised candidate job-fit scores by 30% by designing a feedback and ranking analytics layer that surfaced skill gaps for tailored resume improvement.

### E-commerce Analytics Platform | [Link](#)

Dec. 2025 – Jan. 2026

- Root-caused delivery delays to process waste rather than headcount by architecting a PostgreSQL star-schema data warehouse and Python analysis engine modeling orders, support tickets, and fulfillment SLAs.
- Delivered actionable staffing ROI recommendations for operations leadership by building a KPI and cost-efficiency metrics pipeline that surfaced bottlenecks across the fulfillment funnel.
- Enabled faster, self-serve insight discovery for stakeholders by designing an interactive React/Recharts dashboard visualizing order, ticket, and delivery trends in real time.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, TypeScript, SQL, C++, C#, C, .NET

**Frameworks & Libraries:** React, Node.js, Express.js, FastAPI, Pandas, NumPy, Scikit-learn, TensorFlow, Keras

**AI/ML & Data:** Machine Learning, Deep Learning, NLP, XGBoost, SHAP Explainability, Power BI, Tableau, Excel

**Databases:** PostgreSQL, MySQL, SQLite

**Cloud, DevOps & Tools:** AWS, Docker, Git, REST APIs, JWT Auth, System Design, Agile/Scrum, CI/CD

**Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems

## CERTIFICATIONS

- Learn Machine Learning & AI — Udemy (Jan 2025)
- Data Science Job Simulation — British Airways (May 2025)
- Preparing Data for Analysis with Microsoft Excel — Microsoft (Jun 2025)

## ACHIEVEMENTS

- Solved 600+ Data Structures & Algorithms problems on LeetCode
- Solved 200+ problems on GeeksforGeeks
